

God Is!

In Genesis 1:1, it is recorded, “in the beginning, God”. One cannot find a more simple statement about God’s existence. Yet, it is a dynamic statement. It is a statement of fact. The writer does not go about trying to prove God’s existence in this statement. The statement is axiomatic. God is! In our society many doubt this declaration and many outright deny it. And, even though the first statement given in the Bible is not an attempt to systematically prove God’s existence, that is not to say that the evidence does not exist to do that very thing. As a matter of fact, the evidence for the existence of God is abundant and irrefutable. For the next few weeks we will deal with some areas of proof for the existence of the God of the Bible.

First, let us observe the world in which we live. It is an irrefutable fact that all that has design, had to have been designed. And design implies intelligence. Some have denied this in the past, but it seems that even some of those who are agnostic and atheistic, are realizing the truth of Intelligent Design. One need only examine a human body with all of its intricate systems and know that a designer was behind the making of it. Some would explain the bodies design as simply a product of random mutation and chance (Organic Evolution). But, this does not explain the systems in the body that function primarily in one correct fashion. Evolutionists state that each organism went through stages of development. Each stage of development was an improvement on the last stage. This continued until the organism was “complete”. But, this does not explain the human Respiratory system and its function. As it is designed, there can be but one way for it to properly function. The Designer had to get it right the first time. This organization demands intelligence. Yes, God is!
